PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re the Application of: LEVINE ET AL Serial No.: 09/964,384 Filed: September 28, 2001 For: TELEPHONE INTERCOM METHODS AND SYSTEMS	Art Unit: 2643 Examiner: Taylor, Barry W.
--	--

Examiner Taylor:

Enclosed below is an example of language that could be used in an amended claim for the above-cited application. We look forward to discussing this matter with you further on April 22, 2004. the underline portion indicates material not currently incorporated in claim 1 of the above-cited application.

1. A method for providing an intercom service, the method comprising: receiving an intercom service request from a location, the intercom service request including a calling number associated with the location;

determining that the calling number corresponds to a subscriber to the intercom service;
receiving an on-hook signal from the calling location; and

directing initiation of an intercom call to the location, wherein the intercom session is established between two or more telephones each connected to a first line at the location.
